2. INSTALLATION

2.1 Connect one end of handset coil cord to Handset and the other end to Base Unit.

2.2 Use the straight Line Cord to connect the Base Unit at socket (13) to Wall Outlet. Care must be taken to ensure that the sockets match the respective plugs. In case your house is not equipped with a compatible wall outlet, you may need an adaptor, or you should consult your distributor/retailer for assistance.

The LCD display will change from low contrast to normal contrast during power charging. And then user can operate the unit with the following steps.

2.3 Desktop

To install base support to the bottom of the base, insert the upper hooks to the base (1), and then push base support forward to the base (2).

To remove base support from the bottom of the base, push the lower side of base support to upward direction (3).

Wall Mount

This telephone set can be mounted on wall. To prevent the Handset from falling, take out the Handset Guide (5), rotate it 180°, and then re-insert in the original place.

3. TELEPHONE OPERATION

3.1 Phone Setting

At the on-hook or off-hook state, press **OK** key into the setting mode, and the LCD will display:

VIEW MENU   Use **UP** or **DOWN** key to select among different items. When you choose one item, press **OK** key again to go into its setting. After you have finished with one item, press **OK** key again to confirm and/or move to another item. To change items, always use **UP** or **DOWN** keys. If you want to quit the setting mode at any time, press **C** key.

The settings of different items are shown in details as follows:

3.1.1 Language

When the LCD displays **SELECT LANGUAGE**, press **OK** key once, LCD will show **Dutch** as default setting. Use **UP** or **DOWN** key to select among the languages of English / Dutch / French / German.

3.1.2 Date/Time

When the LCD displays: **DATE/TIME**, press **OK** key once, the year digits will flash. Use **UP** or **DOWN** key to change the year (Step is 1), then press **OK** key to confirm it and move to the setting of the hour. Repeat the operation to set the minute, day and month by turn. The LCD will automatically display the corresponding day of the week. If it is a FSK format caller ID signal received, the current month, date and time display will be updated (while the year remains unchanged).

3.1.3 LCD Contrast

When the LCD displays: **CONTRAST ADJUST**, press **OK** key and then use **UP** or **DOWN** key

to select among 5 different contrast levels the one that you prefer. The default setting is 3.

3.1.4 Set Flash

When the LCD displays **SET FLASH**, press **OK** key and then use **UP** or **DOWN** key to select the flash time: 100ms, 120ms, 300ms, 600ms. User can press **OK** key to confirm or **C** key to exit.

3.1.5 Input Phone Book record

When the LCD displays: **PHONEBOOK INPUT**, press **OK** key once, then you could input the telephone number. Press **OK** key again to confirm the number and then input the name. Use **C** key to correct. When finished, press **OK** key again to confirm. To exit the operation, press **C** key.

3.1.6 Edit Phone Book record

When the LCD displays: **PHONEBOOK EDIT**, press **OK** key once and input the first character of name, you could view the corresponding telephone numbers by pressing **OK** key. If no character input, press **UP** or **DOWN** key to select the record that you want to edit. The cursor will be flashing on the last digit of the number by pressing **OK** key. Press **C** key to backspace the number and press **OK** key to confirm. Then the cursor will be flashing on the first digit of the name. Press **C** key to backspace, press **OK** key to confirm. To exit the operation, press **C** key.

3.1.7 Babycall

When the LCD displays **BABYCALL**, press **OK** key once and display **BABYCALL OFF**. Use **UP** or **DOWN** key to turn it on and then press **OK** key to confirm. After inputting the BABYCALL number, press **OK** key to confirm. Once BABYCALL is turning on, the LCD will display **BABYCALL ON** in idle display.

3.2 Operation at on-hook state

3.2.1 Receiving incoming FSK & DTMF caller ID

When receiving a phone call, the LCD will display the phone number together with the information of name, date, time, and the number if user had applied for the Caller ID service. A new number will carry a “**NEW**” icon, and a repeated number will carry a “**REP**” icon. A message waiting will carry a ☒ icon. A private call (when the caller prefers his/her number to be hidden) will display “**PRIVATE CALL**”. A call out of service will display “**OUT OF AREA**”. An incorrect incoming signal will display “**NOT AVAILABLE**”. If it is a FSK format caller ID signal, the current month, date and time display will be updated (while the year remains unchanged). If there is no information from exchange, the name shown on the LCD will be same as that in the phone book.

3.2.2 Checking incoming caller ID

User can use **UP** or **DOWN** key to view the information of the incoming calls including phone number, date, and time.

3.2.3 Re-dialing an incoming caller ID

For a local call, just press the **SPEAKER** /  key when the caller's number is on display.

3.2.4 Checking outgoing calls

User can use **REDIAL**/ key to view the outgoing numbers and duration of each call. To re-dial, press **SPEAKER** key or pick-up **HANDSET** directly.

3.2.5 Checking phone book

Press **PHONE BOOK** key and input the first character of name. You could view the corresponding telephone numbers by pressing **PHONE BOOK** key again. If no character input, you could use **PHONE BOOK** key to view in sequence. To re-dial, press **SPEAKER** key directly.

3.2.6 Pre-dialing

Enter a phone number and press **SPEAKER** /  key to dial out. For any input mistakes, press **C** key to correct.

3.2.7 Babycall dialing

Press any key except the **OK** key to dial out the pre-set number when BABY CALL function has been turned on.

3.2.8 C key

1. In the setting mode, use it to correct any input mistakes or quite the setting.
2. In the pre-dialing mode, use it to correct any input mistakes.

3.2.9 Delete / key

1. When scrolling outgoing calls, use it to delete a phone number.
2. When scrolling incoming calls, press  **key** to delete a phone number.
Press and hold  **key** for 4 seconds to delete all incoming call records.
3. When scrolling phone book, press  **key** to delete a phone book record.
Press and hold  **key** for 4 seconds to delete all phone book records.

3.2.10 Phone number store

1. One-touch memory

-- On-hook + pre-dialing number + **OK** + **Mx** (x = 1 ~ 4)

-- On-hook + incoming call + **OK** + **Mx** (x = 1 ~ 4)

-- Dial out: Off-hook + **Mx** (x = 1 ~ 4)

or Press **Mx** (x = 1 ~ 4) first and then off-hook

2. Two-touch memory

-- On-hook + pre-dialing number + **OK** + **N** (N = 1 ~ 9, 0, *, #)

-- On-hook + incoming call + **OK** + **N** (N = 1 ~ 9, 0, *, #)

-- Dial out: on-hook + **M..** + **N** (N = 1 ~ 9, 0, *, #)

3. Phone Book memory

Incoming call + **OK** + **PHONE BOOK** + edit of phone book + **OK**

3.2.11 Ringer volume control

Ringer volume can be adjusted to 3 different levels of **OFF / L / H** by the slide switch at the bottom.

3.2.12 Ring Indicator (Ringer LED)

The ring indicator will be blinking when there is an incoming call.

3.3 Operation at the off-hook state

3.3.1 Checking incoming and outgoing calls

You can use **UP** or **DOWN** key to view the information of the incoming calls including phone number, date and time. Press **REDIAL** /  key to check outgoing call record with call duration.

3.3.2 Dialing for display mode

During the number shown on LCD such as incoming call, outgoing call and phone book memory, press **SPEAKER** /  key or pick up handset to dialing out the number.
